

# New noise log detailing everything heard as advised by WDH on the 15th

*Everything logged is heard over our TV and computers.*

## [**Day 6**]

### Key

- Very loud & Stressful
- noisy, stressful after extended time
- Acceptable noise

For the start of the day there wasn't really any problem, the main cause of the problem (the big guy who lives there) wasn't in, there was some lite bangs and walking around which is expectable in a downstairs flat, it got a little noisier towards the end of the day and early morning but nowhere near as bad as when the other guy's home.

This day was a little better because the main cause of the problem (the bigger guy that lives there) wasn't home, which is clear by the logs, pretty much all day walking around was lite, there was very little banging and when there was it was for short periods, but despite it being quite for a night we were both stressing about when the noise would start up again, it's all we ever think about anymore.
